### Portfolio Highlights

- 50% positive re-leasing spreads<sup>6</sup> across 13 lease deals
- c.79,000sqm lease terms agreed<sup>7</sup> (7% of portfolio GLA)
- c.37% of portfolio leases expire by FY28 providing opportunities to capture solid rent reversion
- Assessing potential power bank across CIP's existing infill portfolio
- \$456m existing data centre portfolio, 12% portfolio weighting
- \$60m of divestments, 5% average premium to book value, delivered strong IRRs
- \$47m portfolio valuation gains<sup>8</sup>; 5.83% weighted average capitalisation rate
- Commenced \$60m of development projects, progressed planning on \$1.1billion future development pipeline<sup>9</sup>

Grant Nichols, CIP Fund Manager and Head of Listed Funds, said, "During HY25, CIP continued to harness persistent industry tailwinds driven by demand for urban infill industrial facilities against a backdrop of limited supply. To this end, CIP achieved strong re-leasing spreads (+50%<sup>6</sup>) and a strong like-for-like increase in net operating income of 6.4%. These strong results were driven by CIP's portfolio construction, which provides a 90% exposure to east coast Australia, a c.90% weighting to urban infill markets and an average unit size of c.7,800sqm, enabling CIP to capture comparatively deep levels of tenant demand and leasing velocity.

"Furthermore, non-core divestments totalling \$60million were achieved at an average premium to book value of 5%. CIP has consistently sold assets at or above book value for the past eighteen months, both underpinning NTA and providing strong valuation evidence. In HY25, the portfolio delivered a \$47 million like-for-like valuation gain<sup>8</sup>, which is the second consecutive period of valuation gains.

Jesse Curtis, Centuria Head of Funds Management, said, "Opportune macroeconomic factors including continued population growth, increasing ecommerce adoption, and onshoring of supply chains are driving demand for urban infill industrial facilities. CIP's portfolio is well positioned to capitalise on these trends while demonstrating strong fundamentals including a healthy WALE, high occupancy, considerable scale and reach across Australia. The current trading price also provides compelling value in light of CIP's current NTA against a backdrop of persistent sector tailwinds."

CIP benefits from a 12% portfolio weighting to data centres, valued at \$456million. These assets are leased to blue-chip tenants Telstra and Fujitsu. CIP is currently assessing its potential power bank across its existing infill industrial portfolio, which may provide an opportunity for future data centre use, capitalising on rising demand for data infrastructure and AI capabilities.

- 30 Fulton Drive, Derrimut Vic: c.2,700sqm expansion to the existing facility.

### Capital Transactions

CIP divested two assets at Corio Quay Road, Geelong VIC and 616 Boundary Rd, Richlands Qld for a combined value of \$60 million at an average 5% premium to 30 June 2024 book values, delivering a c.19% and c.16% IRR, respectively. Proceeds were used to reduce debt and strengthen CIP's balance sheet.

During HY25, CIP acquired a strategic industrial facility at 876 Lorimer Street, Port Melbourne Vic for \$8 million, which adjoins the CIP-owned 870 Lorimer Street and provides a 0.5ha consolidated site. The location of the combined site provides higher and better use opportunities in the medium to long term with potential to develop over 160 apartments.

### Summary & Outlook

Grant Nichols, concluded, "Australian industrial markets continue to exhibit the lowest industrial vacancy rates among comparable established international markets in the USA, Europe and Asia. This reflects the strong Australian macroeconomic tailwinds and the significant supply constraints within Australia compared to global markets. Furthermore, Australia's urban infill markets continue to outperform fringe markets with vacancy rates of 1.8% compared to 3.3%, respectively<sup>15</sup>. Adding to this, the outperformance has generated bifurcation in rental growth with infill assets providing an 8.9% year-on-year growth while non-infill asset delivered 4.0% growth<sup>15</sup>. This indicates greater capacity for continued rental growth within urban infill markets, which CIP is largely exposed to."

CIP reaffirms its FY25 FFO guidance to 17.5cpu<sup>5</sup> and reaffirms its distribution guidance of 16.3cpu<sup>5</sup>, expected to be paid in quarterly instalments.
