

ASX ANNOUNCEMENT

22 December 2022

RINCON 2,000TPA Li_2CO_3 OPERATIONAL UPDATE

99.76% LITHIUM CARBONATE PRODUCT PRODUCED DURING COMMISSIONING OPERATIONS

HIGHLIGHTS

- Confirmation of 'battery quality' 99.76% lithium carbonate product produced from Argosy's 2,000tpa operation during commissioning works
- 2,000tpa plant commissioning works currently progressing, with lithium carbonate production operations ramp-up phase scheduled during next quarter
- Validation of chemical processing technology for continued development at Rincon
- Argosy on-track to become only the second ASX-listed battery quality lithium carbonate producer

Argosy Minerals Limited (ASX: **AGY**) ("**Argosy**" or "**Company**") is pleased to advise further progress at the Rincon Lithium Project, located in Salta Province, Argentina, with current commissioning works having produced battery quality 99.76% lithium carbonate product as part of the overall development towards commencing the 2,000tpa lithium carbonate production operation.

The Company is currently conducting commissioning and production test-works to produce battery quality lithium carbonate product from the Company's 2,000tpa operation. The final commissioning phase works are scheduled to be completed over coming weeks, leading to then commencing the production operations ramp-up phase during Q1-CY2023. The Company is targeting to complete the ramp-up phase and achieve steady-state production operations by end of Q2-CY2023.

ASX ANNOUNCEMENT

Argosy Managing Director, Jerko Zuvela said ***"This is a significant milestone for the Company and our onsite Puna Mining operations team, all who have been working extremely hard for this achievement. We are extremely proud to have built the 2,000tpa operation under budget and successfully proven our clean lithium process technology on a commercial scale, specially developed for our Rincon Lithium Project."***

The Company will now look to complete the 2,000tpa operation commissioning works and progress with ramping-up toward steady-state production operations and producing battery quality lithium carbonate product.

The Company is on-track to become the 2nd ASX listed commercial scale lithium carbonate producer, transforming into a cashflow generator and leading to a significant near-term growth phase for the Company.

The lithium market and lithium carbonate prices are forecast to continue around record highs into 2023 and beyond, resulting in very lucrative upcoming product sales revenues."

The Rincon onsite laboratory conducted the analysis works confirming the 99.76% Li_2CO_3 purity from a 250kg sample of lithium carbonate product produced from the current commissioning phase works.

Argosy is well positioned to take advantage of current and near-term lithium prices via the 2,000tpa production operations, with the S&P Platts lithium carbonate price CIF North Asia recently trading at US\$75,500/t.

ENDS

Forward Looking Statements: Statements regarding plans with respect to the Company's mineral properties are forward looking statements. There can be no assurance that the Company's plans for development of its mineral properties will proceed as expected. There can be no assurance that the Company will be able to confirm the presence of mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of the Company's mineral properties.

Argosy confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Argosy confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

ASX ANNOUNCEMENT

ASX Listing Rules Compliance

Argosy advises references to the Company's current target of producing 2,000tpa of high purity battery quality lithium carbonate product at the Rincon Lithium Project should be read subject to and clarified by the Company's current intention that the 2,000tpa production target does not extend beyond a two-year period from the Clarifying Announcement (lodged 10th February 2021, available at www.argosyminerals.com.au and www.asx.com).

At the conclusion of the two-year period, it is the Company's current intention that, subject to feasibility, finance, market conditions and completion of development works at the Rincon Lithium Project, the Company's 10,000tpa production target will apply. The current 2,000tpa production target is intended to form a modular part of the 10,000tpa operation from its commencement.

Argosy further advises that references in this ASX release in relation to the 10,000tpa production target are extracted from the report entitled "Argosy delivers exceptional PEA results for Rincon Project" dated 28 November 2018, available at www.argosyminerals.com.au and www.asx.com. Argosy confirms that it is not aware of any new information or data that materially affects the information included in the Announcement and, in the case of the Production Target, Mineral Resources or Ore Reserves contained in the Announcement, that all material assumptions and technical parameters underpinning the estimates in the PEA announcement continue to apply and have not materially changed. Argosy confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the PEA announcement.

Competent Person's Statement

The information contained in this ASX release relating to Exploration Results has been prepared by Mr Jerko Zuvela. Mr Zuvela is a Member of the Australasian Institute of Mining and Metallurgy and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Zuvela is the Managing Director of Argosy Minerals Ltd and consents to the inclusion in this announcement of this information in the form and context in which it appears. The information in this announcement is an accurate representation of the available data from exploration at the Rincon Lithium Project.

Chemical Engineer's Statement: The information in this announcement that relates to lithium carbonate processing and testworks is based on information compiled and/or reviewed by Mr Pablo Alurralde. Mr Alurralde is a chemical engineer with a degree in Chemical Engineering from Salta National University in Argentina. Mr Alurralde has sufficient experience which is relevant to the lithium carbonate processing and testing undertaken to evaluate the data presented.

ABOUT ARGOSY MINERALS LIMITED

Argosy Minerals Limited (ASX: AGY) is an Australian company with a current 77.5% (and ultimate 90%) interest in the Rincon Lithium Project in Salta Province, Argentina and a 100% interest in the Tonopah Lithium Project in Nevada, USA.

The Company is focused on its flagship Rincon Lithium Project – potentially a game-changing proposition given its location within the world renowned "Lithium Triangle" – host to the world's largest lithium resources, and its fast-track development strategy toward production of LCE product.

Argosy is committed to building a sustainable lithium production company, highly leveraged to the forecast growth in the lithium-ion battery sector.
